## 6. How to Use

### 6.1 App download

Download the WiiM Home application from App Store for iOS based devices and Google Play Store for Android based devices. The application supports English, Spanish, French, German, Italian, Portugese, Korean, Simplified Chinese, Traditional Chinese and Japanese.

## 6.2 Connection

### 6.2.1 First time usage & BLE WiFi Setup

- Plug in the power cable.
- The LED light will start flashing, indicates the system is being bootup, wait till the LED flash slowly.
- Make sure your mobile has connected to your home network and your GPS and Bluetooth is on.
- Open WiiM Home APP, for Android device, the system will ask for permission to use GPS data & File storage, please click accept to continue. This GPS permission is setup by Google for BLE usage, once setup is finish you can go to system settings and disable it, file storage permission is to let WiiM Home access your mp3 files store in your mobile.
- WiiM Home APP will list out all the device available for setup, choose the one you want.
- Now enter password for your network, if this is not the network you want the device to connect, you can change it to the desire one.
- Once connection is finished, it will automatically check for new updates.
- Then you can change the name of the device. You can select a preset one or enter your own.
- After you define the name of the device, you will see it appears in the device list in WiiM Home app and now you can start streaming music.

\* If you change to another router, or the password of the connected router has been changed, please long press Play/Pause button for 5 secs in WiFi mode to reset the connection.

\* Attention for Android users Different brand mobile phones may ask you to allow to use SoundSystem WiFi network, please choose yes, if not, you may not able to set up successfully.

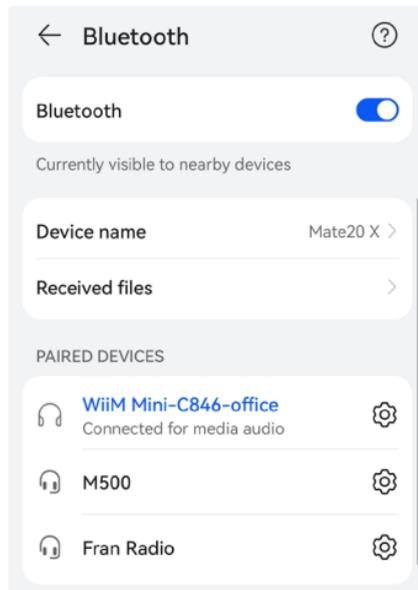

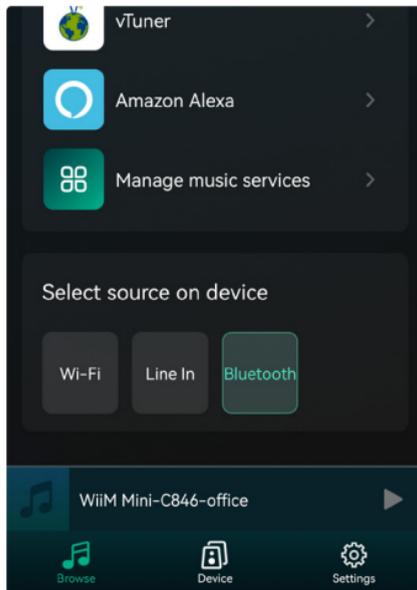

It may also ask you to authorize other things, please choose yes or it may affect your use.

## 6.2.2 There is another way to setup WiFi if you are using iOS device:

- Plug in the power cable.
- The LED will start flashing indicates the system is being bootup, wait till the LED flash slowly.
- Open your iOS device and open the Home app located on the home screen.
- Tap the “+” button located at the top-right corner of the screen.
- Tap “Add Accessory”.
- Tap “More options...”
- Tap on your device’s name which should listed under “Nearby Accessories”.
- Enter the required code if prompted.

## 8.2.3 Bluetooth

To use Bluetooth, please switch to bluetooth via app or by long press + & - button at the same time for 3 secs, then find bluetooth device **WiiM Mini** from your phone bluetooth setting and pair it .

## 8.3 App Features

### 8.3.1 Device Setting

**Rename:** Change the device name.

**Speaker Info:** Display device information like IP address, Mac address, SSID, firmware version, factory reset, etc.

**Alarm Clock:** Setup up to 4 different alarm clocks with music of your choice.

**Preset Content:** 6 Preset music buttons.

**Amazon Alexa Settings:** Here you can setup Alexa language.

**Sync Audio:** Here you are setup your device to auto sync timing with another speaker in multiroom playback, or you can adjust it manually.

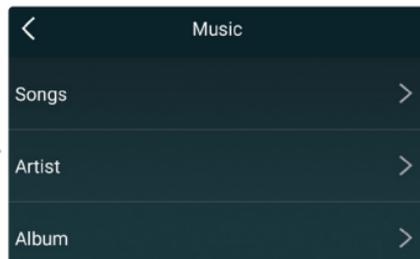

### 8.3.2 To Play Local Storage Music

Click the “**My Music**” on the Application and choose the Music ready there.

**NOTES:** The iOS based devices have blocked the access to iTunes library.

### 8.3.3 To Play Music From NAS

Please note that our system only support NAS with DLNA feature.

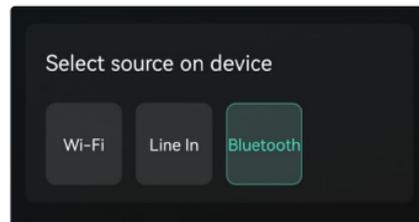

### 8.3.4 To Play Bluetooth Mode

Choose the Bluetooth mode on the application Or long press - & + buttons for 3 secs, the LED will change to green.

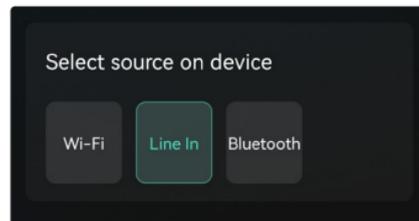

Open the Bluetooth on your mobile device.

Pair the device Bluetooth (WiiM Mini) and play.

### 8.3.5 To Play Optical or AUX in Mode

Once you connect AUX in cable, you can choose AUX mode on the application to play sound from the audio source connected.

## 8.4 Voice Control

With Voice Control, you can navigate and interact with your device using your voice to search, play, stop or skip music and more.

When Voice Control is configured, you can speak commands just like you would perform an action by touch.

### 8.4.1 Works With Alexa

Download Amazon Alexa App and turn on Amazon devices or 3rdparty Alexa Built-in devices.

- Configure one to more devices.

If your device is not logged into your Amazon account in the WiiM Home App.

- Open WiiM Home App, click "Browse -> Amazon Alexa -> Get Started"
- Log in to your Amazon account.
- Open the Amazon Alexa app and log in.

If your device is logged into your Amazon account in the WiiM Home App.

- Open the Amazon Alexa app and log in the same Amazon account as the WiiM Home app.
- Click "Devices" at the bottom of the page.
- Click "+" in the top right corner.
- Click "Combine speakers ->Multi-room music"
- Select the configured Echo or other Amazon devices and the configured WiiM mini device.
- Click "Next" and choose the group name (Bedroom or other).
- Amazon Alexa app prompt that the group has been created.
- "Alexa, play some music in the Bedroom, then the Multi-room group playback can be controlled.

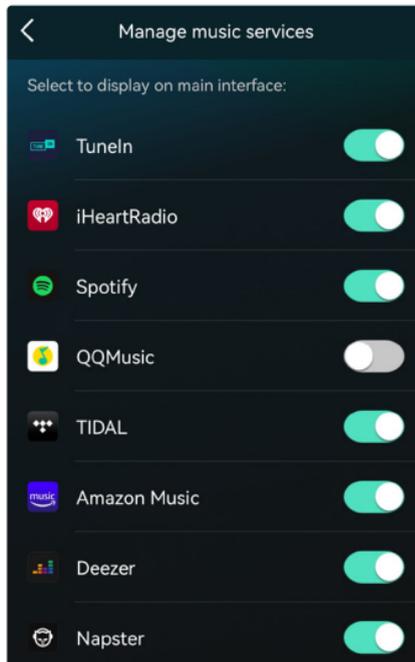

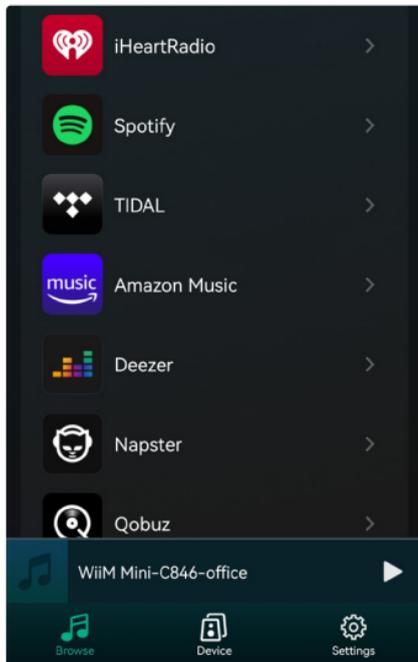

### 8.4.2 Works With Siri

- Configure one to more devices.
- Open a music app (like Apple Music) and select a track to play.
- Tap .
- Select your speaker/speakers or Home Pod.
- Say "Hey Siri, stop music/Play music" or touch the top of Home Pod to wake up Siri, say "Stop music/ Play music".

## 8.5 Streaming Services

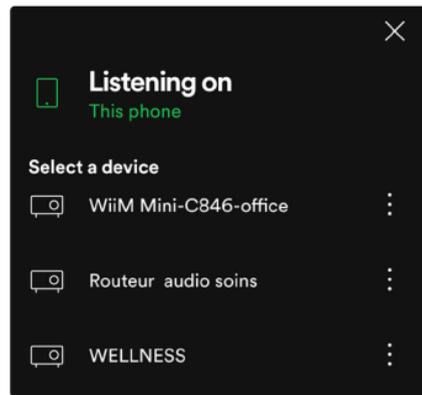

To use the online streaming services, iHeartRadio, Spotify, Tidal, Qobuz and Deezer may need to register account at the service provider platform.

### 8.5.1 Spotify

To use Spotify, you have to own Spotify premium account. You will find the device in the device list on the Spotify application and choose the device you want to play.

NOTE: One Spotify account can only stream to one device at a time.

### 8.5.2 Airplay 2

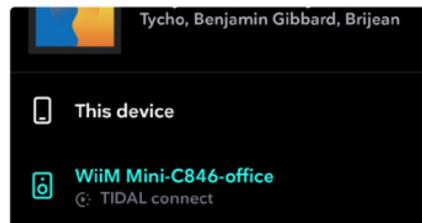

The Device Supports Airplay 2, You can Choose the AirPlay and Play Music. You can also play music to multiple device that supports airplay 2 and form multiroom playback.

### 8.5.3 Tidal Connect

To use Tidal, you have to own Tidal HiFi account. You will find the device in the device list on the Tidal application and can choose the device you want to play to.

Note: One Tidal account can only stream to one device at a time.

## 8.5.4 Qplay

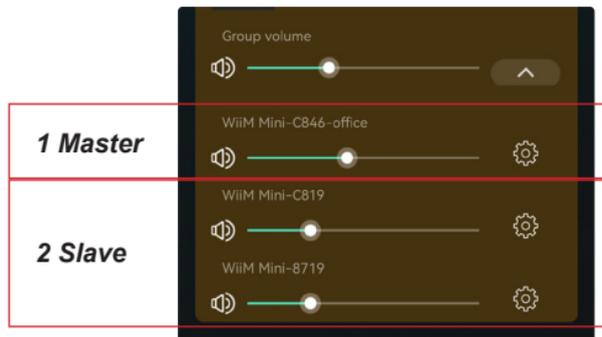

Our Devices Support QQ Music using the Qplay protocol, you have to turn on the Qplay in the QQ Music player setting and then find the device in the Qplay list.

## 8.6 Multiroom and Multizone

Users can group multiple rooms and zones on the application.

For example, you can group devices 1, 2 and 3 to play the same music in sync, or group devices 1 and 2 as zone A and devices 3 and 4 as zone B, and play different music in zones A and B.

### 8.6.1 Add / Remove Device to Multiroom

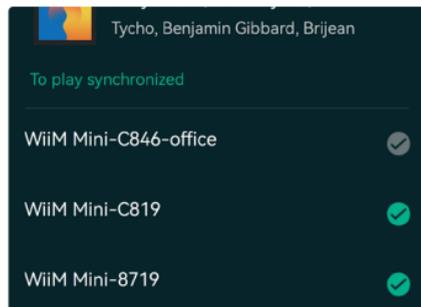

In order to add device to multiroom function, click on the “+” mark of the device you want to be the master device. A list of available devices will pop out and you can select the device you want to add as slave device.

Click the Done button when finished.

The gray tick icon represents the master device and green tick icon represent the slave device.

To remove device from multiroom function, click on the “+” mark again to bring up the device list, and unselect any slave device you want to remove. Then click on the Done button to confirm.

If all the slave device is removed, multiroom function will disable.

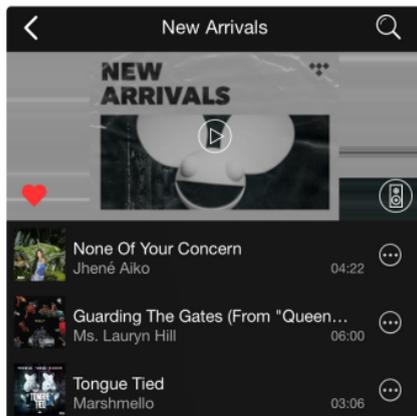

## 8.6 Left and Right Channel

Users can choose the right channel or left channel or stereo mode on the application, or choose left channel on device A and choose right channel on device B, and group them together and play in sync to make stereo.

## 8.7 Preset

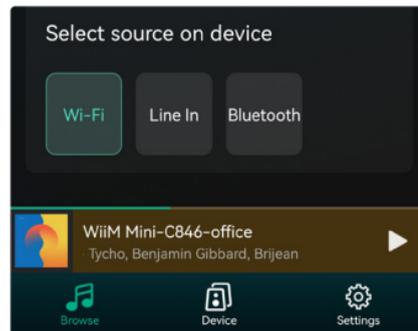

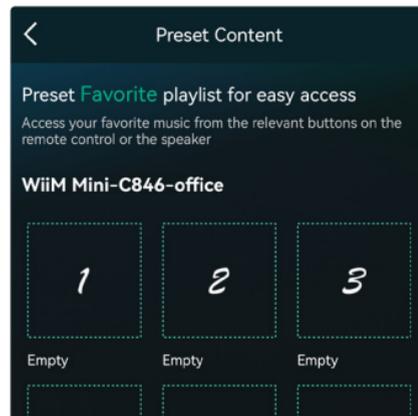

You can setup 6 preset buttons for quick access to online music and online radio stations.

When you see the speaker icon  on the online music or online radio station, it means you can add it to the preset list. When you press the preset button, it will auto playback the music you store in that button.

## 8.8 Source mode Change

Users can change play mode on the application, WiFi, Bluetooth, Line input. To change from Bluetooth/line input to WiFi, only need choose the online streaming services such as Tidal, Qobuz or Spotify or cell phone local storage music or any music via DLNA or UPnP streaming.

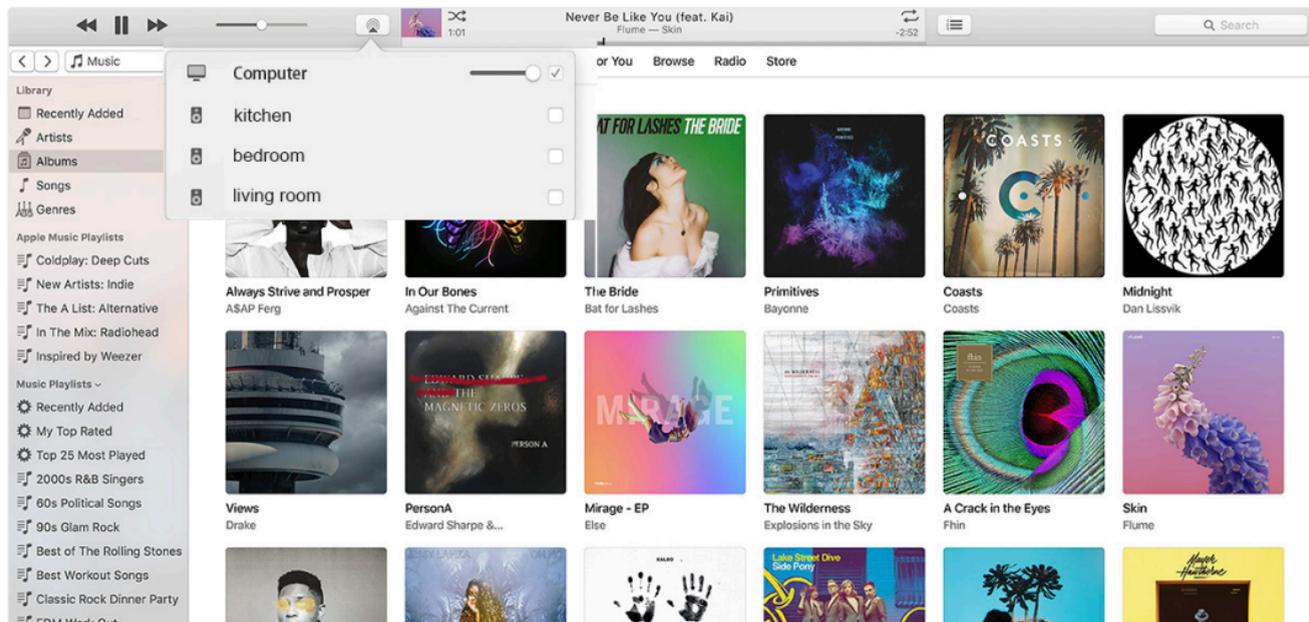

## 9. Play on PC

There are Several Tools to Play Music from the PC.

### 9.1 To Play Music From iTunes on Mac and Windows PC

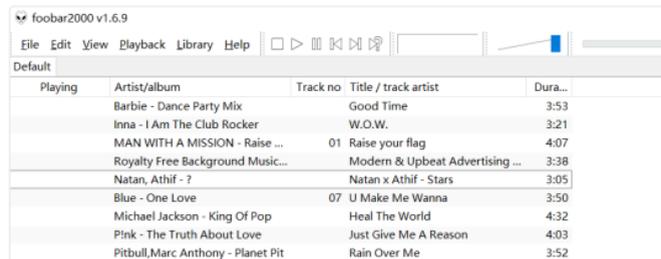

Our devices can stream audio sources from local storage, media library in Mac and Windows PC and online services from iTunes. Users can easily play and switch music, control volume and choose the audio devices to group and upgroup the audio devices.

## 9.2 To Play Music From Windows PC via Foobar2000

Our Devices Support UPnP Protocol, With the Popular Foobar2000, You can Play Music from Windows PC to Our Devices. Please follow the steps below:

1. Download the Foobar2000 and install it.
2. Refer to the doc how to add UPnP component at our website download column.
3. Refer the link below how to add UPnP Component [http://wiki.hydrogenaud.io/index.php?title=Foobar2000:How\\_to\\_install\\_a\\_component](http://wiki.hydrogenaud.io/index.php?title=Foobar2000:How_to_install_a_component)
4. Restart the Foobar2000, Then Check: *Library> configure> output> device*, you will see the *PLAYER* in device option column.
5. Choose the Device to Play the Music.

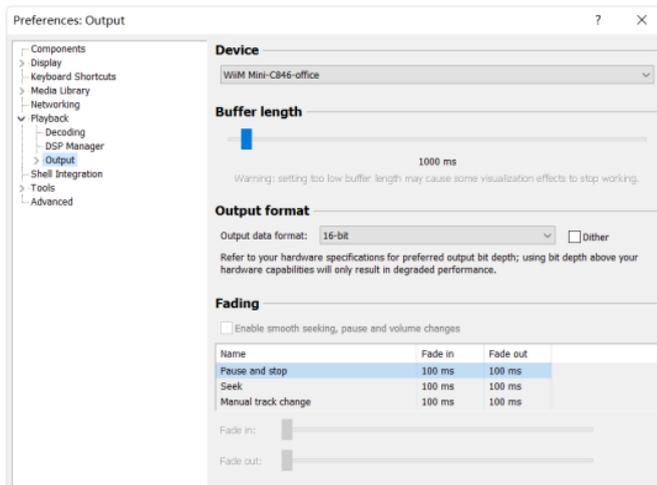

foobar2000 v1.6.9
